ABOUT ME

I am a Junior Software Developer passionate about building end-to-end web solutions using Python and JavaScript ecosystems. Unlike traditional development, I focus on integrating Artificial Intelligence into practical applications, bridging the gap between robust backends and dynamic user interfaces.

My technical approach combines the agility of modern frameworks with the discipline of software architecture. I don't just write code; I build scalable products with a focus on Clean Code and maintainability.

EXPERIENCE

Software Developer
Cordoba Government - Internship

Argentina
June 2025-December 2025

- Contributed to the new institutional portal redesign using WordPress and PHP
- Developed and customized Plugins to extend site functionality
