ABOUT ME

Junior Full Stack Developer specializing in the Python and JavaScript ecosystems. I build end-to-end web solutions using React, Next.js, Angular and FastAPI/Django, focusing on clean code and SOLID principles. I possess practical experience in corporate web restructuring using WordPress/PHP and a strong interest in modernizing applications via AI integrations like RAG and Chatbots.

EXPERIENCE

Software Developer   *Argentina*
Cordoba Government - Internship   *June 2025-December 2025*

- Led the institutional portal redesign using WordPress and PHP, significantly improving site architecture and user accessibility.

- Engineered custom Plugins to extend core functionality, tailoring the CMS to specific institutional requirements.

- Enhanced mobile responsiveness and integrated interactive JavaScript components, modernizing the User Experience (UX).

- Translated UI/UX design requirements into functional, high-fidelity frontend implementations.
